SOFTWARE ENGINEER

github.com/Os-Hokage • linkedin.com/in/DevShams

PROFESSIONAL SUMMARY

Software Engineer with over five years of experience building mobile and web applications. Specialized in cross-platform mobile development with Flutter and Dart, with apps shipped in fintech, logistics, and social products. Currently develops backend services and web applications with C#, Blazor, ASP.NET, VB.NET, and SQL Server. Experienced in translating designs into production interfaces, integrating RESTful APIs, and maintaining scalable application architecture.

WORK HISTORY

PTML • Backend Engineer

Lagos, Nigeria | September 2024 - Present

e-Ramp

- Develop robust backend services for web-based projects, ensuring scalable, secure, and high-performance solutions.
- Design and implement responsive web pages using ASP.NET and VB.NET, delivering an engaging and user-friendly interface.
- Engineering data management solutions with SQL, in combination with ASP.NET and VB.NET, to optimize system performance and reliability.
- Integrate API endpoints effectively to ensure seamless communication between client and server, supporting a cohesive application architecture.
- Build web application features using C# and Blazor, alongside maintaining existing ASP.NET and VB.NET modules.

Gova HQ • Mobile App Engineer

Lagos, Nigeria | December 2023 - July 2024

GovaPay

- Translated intricate UI/UX designs from Figma into highly responsive and visually engaging Flutter UI code, ensuring a seamless and intuitive user experience for financial transactions.
- Developed and maintained the mobile app designed for users to seamlessly manage their finances, including transfers, payments, and account monitoring.
- Implemented key features facilitating secure transactions, account management, and real-time financial updates within the mobile app.
- Employed robust state management techniques to handle incoming data streams and ensure accurate representation of financial information within the app.
- Seamlessly integrated and managed endpoints from APIs, utilizing algorithms to empower vital functionalities such as secure transaction processing, account authentication, and data encryption, adhering to industry standards and best practices.

FInd Logistics • Mobile App Engineer

Lagos, Nigeria | August 2022 - December 2023

Find Logistics

- Translated intricate UI/UX designs from Figma into highly responsive and visually engaging Flutter UI code, ensuring a seamless and intuitive user experience for dispatching services.
- Developed and maintained the mobile app designed for users to seamlessly order dispatch riders for picking up and delivering items.
- Implemented key features facilitating order placement, delivery status updates, and secure payment processing within the mobile app.
- Employed robust state management techniques to handle incoming data streams and ensure accurate representation of order and delivery-related information within the app.
- Seamlessly integrated and managed endpoints from APIs, utilizing algorithms to empower vital functionalities such as location tracking, dispatch allocation, and payment gateways, adhering to industry standards and best practices.

Ready Social • Mobile App Developer

Lagos, Nigeria | January 2022 - August 2022

Ready Social

- Developed and maintained high-quality mobile applications using Flutter and Dart.
- Updated old code bases of large scale mobile applications to modern development standards, improving functionality and maintainability.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Adequately managed state across the app to improve scalability, and wrote clean and reusable code with MVP architecture, also put in best practices of data structures and algorithms to properly reflect data received from the API and displayed in the app.

Gigmile • Mobile App Developer

Ghana | July 2021 - November 2021

Gigmile

- Developed and maintained high-quality mobile applications using Flutter and Dart.
- Translated UI design from Figma to Flutter UI code and suggested best suit algorithms and methodology to integrate product features.
- Collaborated effectively with the team of developers and software engineers to decide on the integration methods and scalability patterns to use.
- Integrated endpoints from local and external APIs using best practices in data structure and algorithms to create the bill payment and funds transfer features of the product
- Adequately managed state across the app to improve scalability, and wrote clean and reusable code with MVP architecture, also put in best practices of data structures and algorithms to properly reflect data received from the API and displayed in the app.

TECHNICAL SKILLS

- Flutter Framework Proficiency
- Dart Programming Language
- JAVA Programming Language
- VB.NET
- ASP.NET
- SQL
- C#
- Blazor
- Cross-Platform Development
- API Integration (RESTful APIs)
- State Management Solutions
- Firebase Services Integration
- Version Control Systems (Git)

EDUCATION

- **Bachelor of Science (B.Sc) Computer Science**

  Al-Hikmah University, Nigeria | 2020 - June 2023.
- **National Diploma Computer Science**

  Kwara State Polytechnic, Nigeria | 2017 - October 2019.
- **West African Senior School Certificate (WASSCE)**

  Oke-Ode Grammar School, Nigeria | 2017.

CERTIFICATIONS

- **Flutter - Advanced Course** - Udemy
- **Software Engineering (Java Technology)** - New Horizons
- **Certificate of language ability - English (8.9)** - Emmersion
